Feedback from Stakeholders:

Institute has structured feedback mechanism to obtain feedback from internal and external stakeholders through various programs.

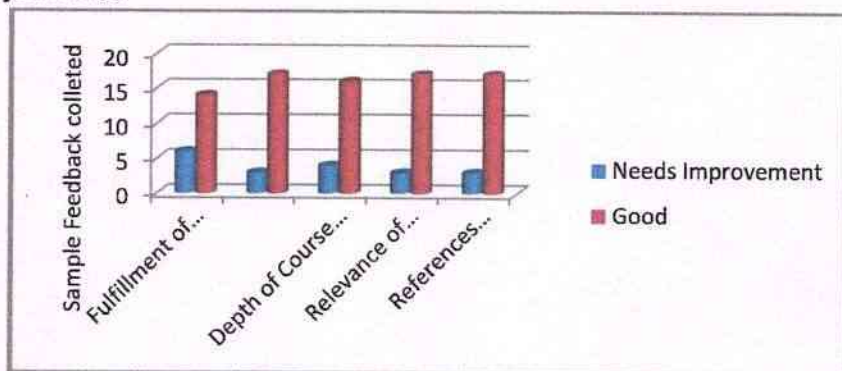

1. Feedback from Students:

Suggestions from Students:

- Students are requested to conduct Workshop/certificate Program on IOT.
- Students are requested to arrange industrial visit.

Action Taken:

- Department decided and arranged the Certificate Program on Advanced IOT.
- Department decided and arranged the industrial visit.

Respected Sir/Mam,
Greetings from Technex, IIT Varanasi & Innovians Technologies.

On behalf of **Technex, Indian Institute of Technology, Varanasi** as the host, it gives us great pleasure to introduce a national level workshop series based on **Advanced IoT (Internet of Things)**. Innovians Technologies will bring students from all over the country together to participate in the celebration of knowledge and creative extravagance along with experts from the fields of academic as well as industry.

This time **Advanced Workshop on Internet of Things** Workshop will be organised by **Technex, Indian Institute of Technology, Varanasi** in association with Innovians Technologies. We, Innovians Technologies provides workshop on various domains for different Engineering Branches on National as well as International Level.

Make your College Zonal Center of Technex, IIT Varanasi:

We are looking for Engineering College of National repute to host our 6 days workshop and competition at their college campus. If You wish to associate with us and want to make your college a workshop center of **Technex, IIT Varanasi & Innovians Technologies**. If you wish to organize any of the workshop, training or FDP then please contact us.

IoT Offline Workshops Center Requirements

- Engineering College/Institution should have a big seminar room/auditorium/lecture hall of seating capacity of (Minimum capacity of 60 seats.)
- A good Quality LCD Projector enough to maintain comfort ability.
- Public Addressing System (2 Cordless MICs.)
- Power backup and 220V AC power Points.
- Free Hospitality & accomodation for 6 days to our visiting delegation during workshopdays.
- Pick & Drop Facility from nearest railway station/bus station/airport.
- A minimum of 60 students will be required to participate in workshop.
- Participants need to bring their own laptop atleast 1-2 laptop per team with working wifi, usb & lan port.
- Wifi Connectivity in Seminar hall for Trainers & Participants -- MANDATORY.

Stages of Event

- **Round 1:** A Workshop will be organized at 30 different Zonal Centres/Colleges in India from Jul, 2023 to April, 2024.
- **Round 2:** A Zonal Round Competition will be organized at the Zonal Centre on last day of Workshop & two best performing team will get Certificate of Excellence from **Technex, IIT Varanasi & two teams of slected workshops will get direct entry in Final Round** competition to be held during **Technex, IIT Varanasi** in the month of Feb/Mar 2024.
- **Round 3:** A Final Round competition will held during **Technex, IIT Varanasi** among all the Zonal Centre winning teams in Feb/Mar 2024 and winning team will get Certificate of Excellence & Prizes.

About Workshop: Advanced IoT is a six days advanced level workshop on Internet of Things. Our Advanced IoT Workshop is completely hands-on based workshop wherein participants will create multiple projects on IoT Kits during the workshop. This Workshop will explore the best practices for integrating sensors, relay module, alexa/google home, MQTT, Google Sheets etc with NodeMCU Platform.

Workshop Highlights

- What "the Internet of Things" means and how it relates to Cloud computing concepts
- How open platforms allow you to store your sensor data in the Cloud
- The basic usage of the Arduino/NodeMCU environment for creating your own embedded projects at low cost
- How to control devices with your Android phone.
- How to send data to the Internet and talk to the Cloud.
- How to update sensor readings on Twitter (Social Networking Sites).

- How to control devices using Alexa/Google Home ?
- Control Electrical Appliances using Relay.
- Sending or receiving data through MQTT.
- Creating Data Logger on Google Sheets for storing sensor data using NodeMCU.

Topics to be Covered in Workshop

- Introduction about Internet of Things
- Basics about Sensors & Actuators
- Introduction about Cloud Computing
- AVR Microcontroller Programming
- Arduino Software Installation
- Introduction about NodeMCU
- Programming fundamentals (C language)
- Programming Basics:
- **Project 1:** Simple LED Program
- **Example 1:** Basic LED program
- **Example 2:** LED Blinking Program
- **Example 3:** Integrating IR Sensor with NodeMCU
- **Project 2:** Integrating Sensors & Reading Environmental Physical Values.
- **Project 3:** Voice Controlled Mini Home Automation using Android Smartphone
- **Project 4:** Control Devices using Localhost Web Server for Home Automation
- **Project 5:** Integrating Relay Module and Controlling AC Electrical Appliances.
- **Project 6:** Use NodeMCU to Upload free data from Environmental Sensors to Cloud Server.
- **Project 7:** Controlling/monitoring devices using Alexa/Google Home.
- **Project 8:** Integrating MQTT with NodeMCU and sending or receiving messages through MQTT Protocol.
- **Project 9:** Creating Data Logger on Google Sheet for storing sensor data using NodeMCU
- **Project 10:** Control Electronic Devices from anywhere across the world using Internet & Mobile App

We also have two days beginner level IoT workshop available using Nodemcu, RaspberryPi. Apart from it 5 Days Workshop on IoT using Arduino & RaspberryPi.

Eligibility: Students from any branches can attend this workshop. The pre-requisite for joining this workshop is zero, anyone can participate in this workshop.

Certification: During this whole event following Certificate will be provided:

- Certificate of Participation to all participants from **Technex, IIT Varanasi & Innovians Technologies**.
- At the end of this workshop, a small competition will be organized among the participating students and winners will be awarded with a '**Certificate of Excellence**'.
- Certificate of Coordination for the coordinators of the workshops from **Technex, IIT Varanasi & Innovians Technologies**.

Venue: The Entire Workshop will be conducted in the Organizing College Campus, so that students need not to go anywhere else.

Fee:

- **Rs 800 per participant (without take away kit).** Kits will be provided for hands-on (1 Kit in a Group of 4) during the workshop but at the end of workshop it will be taken back. -
- *Discounted Fees*

Description:-

Shri Chhatrapati Shivaji Maharaj College of Engineering, Department Computer Engineering organized 6 day workshop on “Advanced Internet of Things” held on 07 and 12 August 2023. The resource people were Dr. Anvesh Reddy, Lead Trainer from IIT (Banaras Hindu University) Varanasi, Mr. Sharad Chandra, Assistant Trainer from IIT (Banaras Hindu University) Varanasi. Mr. Ganesh Yewale, VRDE, Ahmednagar was chief guest of inaugural function and Prof. Rohit A. Ghadage was Workshop Co-ordinator of the workshop.

Following key points was covered in the Workshop:-

Day 1:

1. Inauguration Function
2. Introduction about Internet of Things
3. Introduction about Sensors and Actuators

Day 2:

1. Introduction about Cloud Computing
2. Introduction about NodeMCU 8266
3. Programming Fundamentals (C Programming)
4. Arduino IDE installation and Programming

Day 3:

1. Integrating Bluetooth and talking to Android Phone
2. Communication with Cloud Server

Day 4:

1. Project: Integrating Sensor and Reading Environmental Physical Values
2. Project: Voice Controlled Home Automation

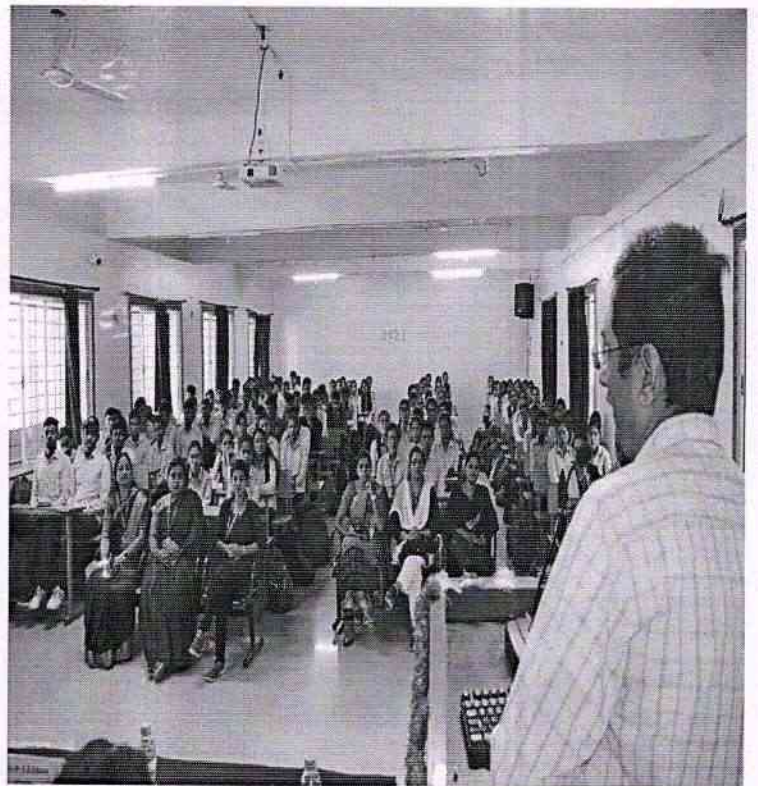

Day 5:

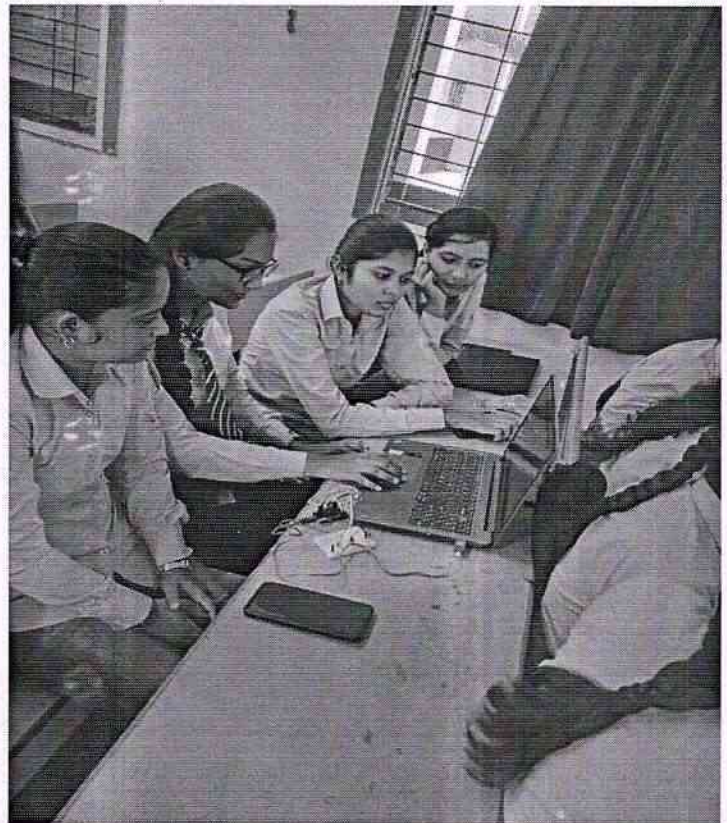

1. Project: Controlling Devices using Alexa/Google Home
2. Project: Log Temperature Sensor Data to Google Sheet

Day 6:

1. Project: Integrating MQTT with NodeMCU
2. Project: Control Electronic Devices using IoT Platform & Smartphone from anywhere across the World
3. Valedictory Function

Letter of Thanks

To,

Anvesh Reddy,

Innovation Technologies

Dear Sir / Mam,

It was really a great privilege to Conduct workshop On "Adavanced IOT" at **Shri chatrapati shivaji Maharaj College of engineering, Ahmednagar** on 07/08/2023 to 12/08/2023. I would like to express my gratitude for your valuable Knowledge and presentation on "Advanced IOT". Your valuable guidance had helped us in past and they would help us in future as well. On behalf of the all the faculties of the department, I greatly appreciate your work.

I hope for the same co-operation from you in near future course of the time.

Thanking you.

Yours faithfully,

Department of Mechanical Engineering

Feedback from Stakeholders:

Institute has structured feedback mechanism to obtain feedback from internal and external stakeholders through various programs.

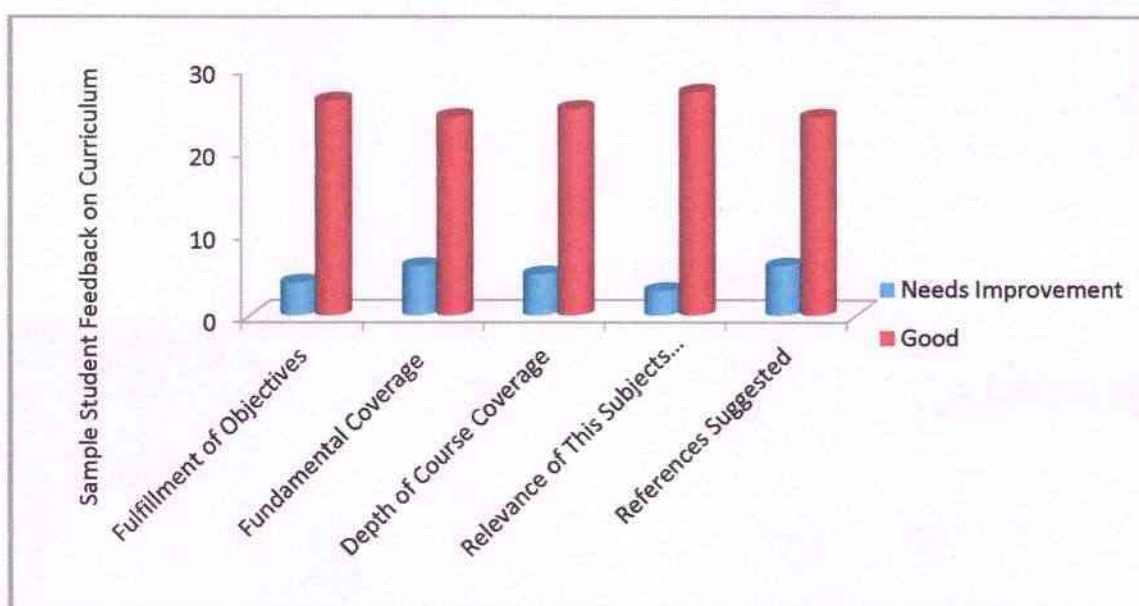

1. Feedback from Students:

Suggestions from Students:

- In order to understand the practical aspects of mechanical engineering subjects, students are expecting more industrial visits, expert/guest lectures, and workshops.

Action Taken:

- The department has been organized an expert lectures, an industrial visits, and a certificate programs for the students.

2. Feedback from Teacher:

Suggestions from Teacher:

- As per the current trends of mechanical industry, a variety of workshops ought to be planned for the students.

Action Taken:

- Department has been arranged Add on/Certificate programme on Solid Modeling by using solidworks in SEM-II for Second year students.

3. Feedback from Alumni:

Suggestions from Alumni:

- Students ought to be familiar with the fundamentals of mechanical engineering software and industries. Students should concentrate on skill-building exercises as well.

Subject: Invitation as a Resource Person for 5 days Workshop on "Solid Modeling by using SOLIDWORKS"

Respected Sir,

We are pleased to invite you as a Resource Person for the Seminar on "Solid Modeling by using SOLIDWORKS" for our SE Mechanical students scheduled on **Monday 15/04/2024 to Monday 22/04/2024**. Your expertise and knowledge in the area would add a great value to the one and all, especially the budding engineers of the country who require the guidance and path-breaking ideas to lead their way through the tough competition in the Global market on this day.

With your vast and in-depth knowledge in the area, you would be expected to deliver the 5 days workshop on the "Solid Modeling by using SOLIDWORKS" as we are aware of your great contribution to this field of work.

We look forward to your presence and guidance in making the event successful.

Thanking you.

Yours faithfully,

Dr. Y.R. Kharde

Dear Sir,

It was really a great privilege to have your presence at Workshop on "Solid Modeling by using SOLIDWORKS" which was held at our Institution from Monday 15/04/2024 to Monday 22/04/2024. I would like to express my gratitude for your valuable training sessions on "Solid Modeling by using SOLIDWORKS". Your valuable guidance had helped our students and staff for their future. On behalf of all the faculties of our institution, I greatly appreciate your expert training session and knowledge sharing.

I hope the same co-operation from you in near future.

Thanking you,

Received

Report on Solid modeling by Using Solidworks

Name of Event:-A Program on "Solid modeling by Using Solidworks"

Date: - 15/04/2024

Time: - 11.30 am

Venue: - In CAD Lab

No. of Sessions: - 15

Department: - Mechanical Engineering

No. of Participants: -61 Students & 2 Staff

Objective: - To create awareness and give hands on experience to students on Solidworks software.

Name of Expert: - Er. Akshay Karale (Owner-MechCAD Engineering, 3rd Floor, Kalika pride, Laltaki Road, Ahmednagar)

Event Description: - For the awareness of "Solid modeling by Using Solidworks", the college organized the program for Students which was conducted by Expert Er. Akshay Karale Owner of MechCAD Engineering, 3rd Floor, Kalika pride, Laltaki Road, Ahmednagar.

The session was started with in the presence of Principal Dr. Y. R. Kharde, H.O.D Mechanical department, Staff and Students. Er. Akshay Karale Sir introduce the students about importance of designing in industry. He also told that his company provides design solutions to companies like L&T etc. The Need of design and design engineer in industry should have some basic knowledge of modeling software's.

After giving all the information about design, he started with the practical session on Solidworks software. He started with sketcher module and assigned students with practice sketches. The doubt was cleared in training session and practice sessions. Session on Part modeling followed by assembly modeling and drafting was also conducted.

Hon. Principal Sir in his speech told the importance of Design engineer and also shared some tips for design engineer on how to identify problem in industry and find a solution for same.

Conclusion of Event: - Students got really benefited by attending this workshop. They are definitely aware about the use of SolidWorks software for design purpose.

BOTHARA AGRO COLD STORAGE is popularly known as Bothara Agro Cold Storage. It is a Partnership with its office registered in Maharashtra. The company carries out its major operations from Maharashtra. The company got registered under GST on Invalid date and was allotted 27AAUFB0165B1ZN as the GST Number.

❖ Introduction of Cold Storage:

Cold storage is a facility that primarily stores food items that are short-lived and highly likely to get spoilt under normal conditions. These may include fruits, vegetables, fish, meat etc. These food items are stored under optimum temperature (primarily low) and humid environment as required for individual items. Almost all cold storage rooms are designed such that these properties are pre-configured based on what is being stored. Some cold rooms are made such that these properties are adjustable.

❖ Construction and Working of a Cold Storage Plant:

A cold-storage facility works on a refrigeration system which helps maintain an adequate temperature and environment as per the specifications of each item being stored. These are the main components of a cold storage room:

- **Compressor:** It is the main component that runs the cold room. It is the only device that needs the energy to run. The compressor consumes almost all the power in a cold room. It is used to raise the temperature and pressure of the refrigerant vapour coming out of the Evaporator. As the pressure is increased, the boiling point increases and the compressor can condense the refrigerant(for example, ammonia) at the temperature of the condenser.

- **Condenser:** It is required to remove the heat from the refrigerant and the circulating water. It carries out phase change of the condenser from gas to liquid at high temperature and pressure. The condenser acts as a heat sink, and its heat exchange efficiency determines the efficiency of the cold storage plant.
- **Receiver:** The high-pressure liquid condensate is stored here. It is here that the refrigerant comes after phase change from the condenser. After it has reached the receiver component, the liquid refrigerant goes to the expansion valve to decrease the temperature and pressure.
- **Expansion Valve:** It reduces the temperature and pressure of the refrigerant using a throttling device. The throttling process occurs through friction and there is a change in the temperature and pressure of the refrigerant. Its pressure changes from that in the Receiver to that in the Evaporator.
- **Evaporator:** The cyclic process that decreases the temperature of the items stored takes place here. It takes heat from the storage compartment or atmosphere that is supposed to be cooled. This heat is then used to vaporize the liquid refrigerant. This way, the food items are cooled and preserved.
- **Blowers:** The cooled air is spread across the room through the convection process, thus, achieving the desired temperature of the room.
- **Refrigerant:** Refrigerant is truly the lifeblood of a refrigerator. It starts in the form of a gas, then a liquid, and back to a gas as it cycles through the refrigerator's parts. This is the process that cools the refrigerator. Refrigerant acts as a heat exchange medium. e.g.- Ammonia, Freon, Methyl Chloride, Carbon dioxide, Isobutane.

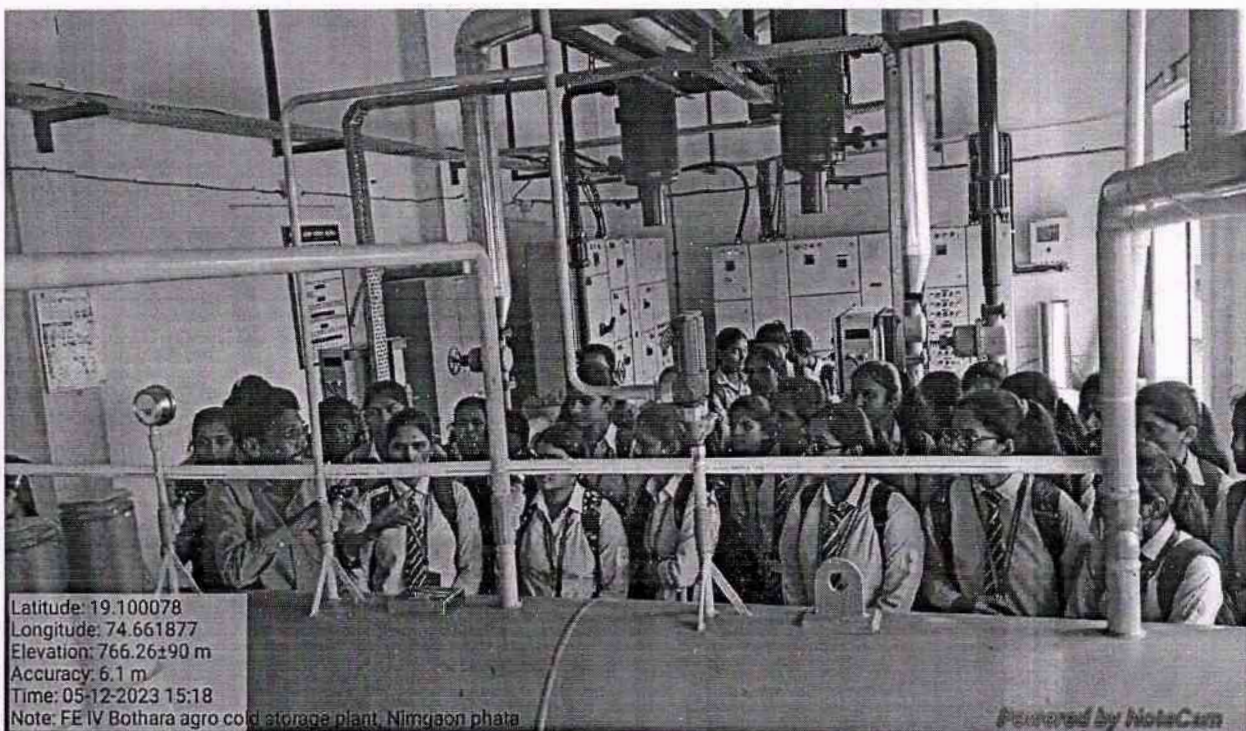

In short, the refrigerant's boiling point is reduced by increasing its temperature and pressure by the compressor. Heat is removed from the refrigerant as it is changed from gaseous to the liquid state by the condenser. Now the refrigerant is transferred to the reservoir for storage. Further, the refrigerant is moved to an expansion valve to reduce the temperature and pressure in the liquid state. The last step takes place in the Evaporator, where the heat from the surroundings is used to change the refrigerant again to a gaseous state, thus causing the cooling effect. The blower circulates this cool air.
