## Purpose Of Visit

Our main purpose for this visit was to give the practical knowledge about different types of Minerals. By this visit students can be familiar with different types rocks, mineral and their Origin. Also in 3th semester subject like Engineering Geology requires knowledge about how Minerals are formed and types of Mineral , so it is very much convenient to see all the practical and components in real time work environment.

### **A] Introduction :**

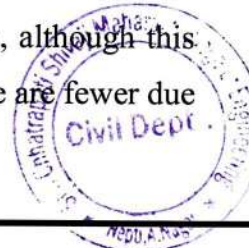

At Museum, they are fully committed to achieving excellence in Preserving Different types of Minerals found in all parts of world. Collecting and discovery of mineral, conveying information of mineral like (origin, age, composition). All this activities are conducted in proper manger and excellence of work is observed.

### **Minerals:**

In geology and mineralogy, a mineral or mineral species is, broadly speaking, a solid chemical compound with a fairly well-defined chemical composition and a specific crystal structure that occurs naturally in pure form.

### **Classification of Minerals:**

Minerals are inorganic chemicals present naturally in the soil as well as dietary components that are necessary for a healthy life. They have a well-organized internal structure, crystalline forms, and unique chemical compositions. They are required for human health for a multitude of reasons, including immune system function, bone, brain, heart, and muscle function, hormone production, glucose control, and nervous system signal transmission. They collaborate with other nutrients to help us complete our daily duties faster and utilize other nutrients more efficiently, and they may be found in everyday things such as pottery, jewellery, and cosmetics. There are around 2,000 known elements on Earth, although this statistic is controversial since some feel there are more, while others say there are fewer due to research concerns.

## Different Types of Minerals at Museum

Native gold is an element and a mineral. It is highly prized by people because of its attractive color, its rarity, resistance to tarnish, and its many special properties - some of which are unique to gold. This mineral is found all over the world.

Fluorite is one of the important mineral raw materials in the industry. In China, it is mainly distributed in the provinces and regions such as Hunan, Zhejiang, Jiangxi, Inner Mongolia, Fujian, and Henan provinces, boasting huge reserves and large numbers of deposits.

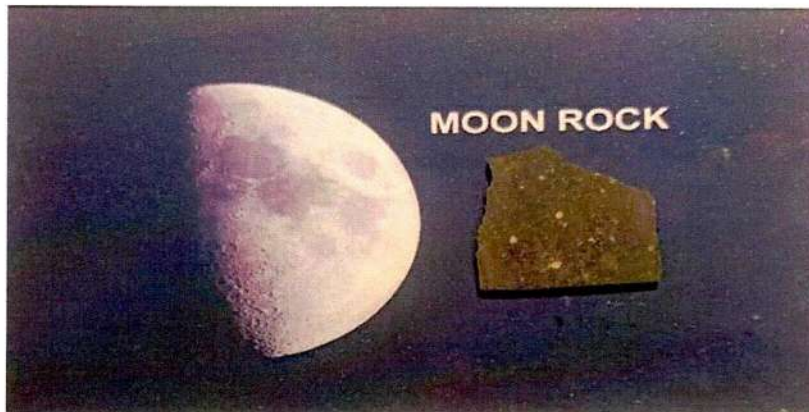

Heulandite is found with other zeolite minerals filling cavities in granites, pegmatites, and basalts. Typical occurrences are in Berufjörður, Iceland; on islands near Bombay; on the Faroe Islands. northeastern New

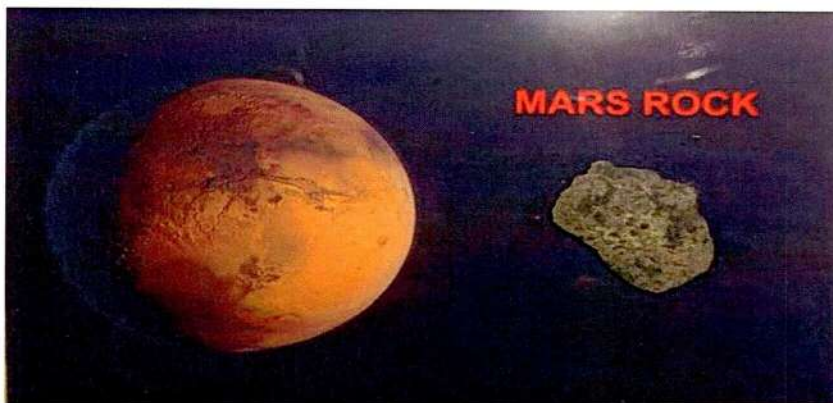

## Minerals form Outer Space

- **Moon Rock**

Moon rock or lunar rock is **rock originating from Earth's Moon**. This includes lunar material collected during the course of human exploration of the Moon, and rock that has been ejected naturally from the Moon's surface and landed on Earth as meteorites. Apollo 11 carried the first geologic samples from the Moon back to Earth. In all, astronauts collected 21,6 kilograms of material, including 50 rocks.

- **Mars Rock**

Of the 60,000 or so meteorites that have been discovered on Earth, at least 175 have been identified as originating from the planet Mars. These rare meteorites created a stir throughout the world when NASA announced in August 1996 that evidence of microfossils may be present in one of these Mars meteorites.

## Fossils Minerals

Fossils are prehistoric hard rock remains or traces of plants or animals preserved in sedimentary rocks. Some of the plants or animals existed millions of years ago. Usually, fossils are preserved by being buried underneath multiple layers of sand or mud.

- **Identification of Fossil rocks**

Bones are more porous than rock, and this texture difference makes them easier to spot. Because of its “spongy” texture, if you touch a fossil to your tongue it will typically stick, whereas rock and soil won't. If you're not in the mood to do the tongue test, you can also look for pores through a hand lens.

**Fossils Rocks**

## Summary

This visit helped UG students to enhance their collective theoretical and practical knowledge of identification of different minerals studying origin, composition and age of mineral. Students can understand Classification of minerals based of varies parameters. Also helpful in 3<sup>rd</sup> semester subject like Engineering Geology.

#### **Overview :**

An expert lecture on Preparation for competitive examination was organized by Civil engineering department for final year students who are interested to prepare for various competitive examination. The lecture was delivered by our alumni Mr. Abhijeet Sharad Gore. He is preparing for competitive examination at Vajiram and Ravi at New Delhi.

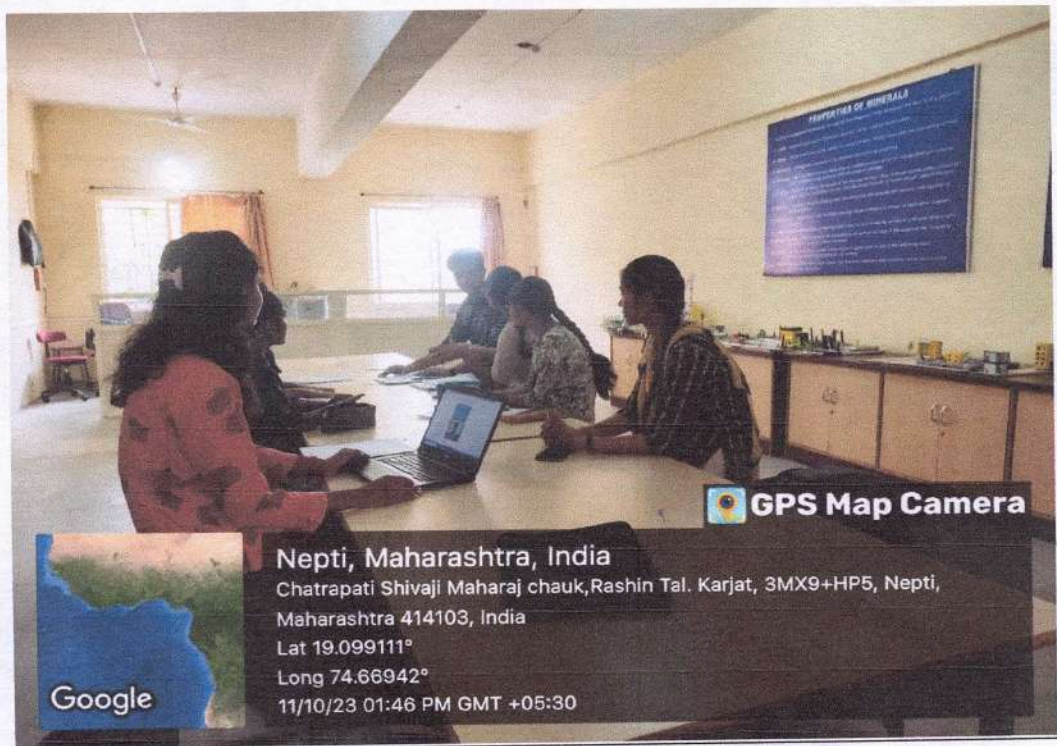

Through this lecture students gained invaluable insights into the journey of aspiring to become a civil servant. Their experiences and advice shed light on the rigors and aspirations that come with this pursuit. One aspect that stood out was the selection of the optional subject, in this case, Political Science and International Relations (PSIR). The expert highlighted the importance of choosing a subject that aligns with one's interests and strengths. They emphasized that a deep understanding of the subject matter and consistent practice are essential for success in the optional paper. Additionally, he shared their experiences of living in Old Rajendra Nagar, a hub for civil services aspirants in Delhi. This locality is renowned for its coaching centres, libraries, and a vibrant atmosphere that fosters a competitive yet supportive community of students. They mentioned the convenience of having access to a wealth of study materials, guidance, and

अहमदनगर, ता. ३० : शहराजवळील चांदबिबी महालावर साचलेला कचरा गोळा करून विद्यार्थ्यांनी स्वच्छतेचा संदेश दिला. 'सकाळ यिन' आणि श्री छत्रपती शिवाजी महाराज इंजिनिअरिंग महाविद्यालयाच्या वतीने हा उपक्रम राबविण्यात आला. विद्यार्थ्यांनी संपूर्ण महाल परिसरातील कचरा गोळा करून त्याची योग्य ठिकाणी विल्हेवाट लावली. विद्यार्थ्यांनी उत्स्फूर्तपणे हा उपक्रम राबविला.

चांदबिबी महाल हे शहरापासून हाकेच्या अंतरावरील ऐतिहासिक ठिकाण आहे. या ठिकाणी शहरासह जिल्हाभरातून पर्यटक येतात. मात्र, येथील स्वच्छतेबाबत अनेकांकडून दुर्लक्ष होते. त्यामुळे महाल परिसरात मोठ्या प्रमाणात कचरा दिसून येतो. हाच कचरा उचलण्याचे काम विद्यार्थ्यांनी केले.
